

-- 63. An isolated antibody of claim 42, which consists essentially of an antibody which specifically binds an epitope from the peptide SEQ ID NO: 17, 20, 26, 29, 30 or 31.

64. An isolated antibody of claim 63, which is a polyclonal antibody.

65. An isolated antibody of claim 63, which is a monoclonal antibody.

66. An isolated antibody of claim 42, wherein said antibody does not cross-react with an epitope from another p60 peptide.

67. An isolated antibody of claim 66, which is a polyclonal antibody.

68. An isolated antibody of claim 66, which is a monoclonal antibody.

69. A composition comprising at least two monoclonal antibodies of claim 60, each of which binds to a different one of said peptides.

70. A composition comprising at least two monoclonal antibodies of claim 62, each of which has been prepared by immunizing with a different one of said peptides, or by immunizing with a different one of said immunogenic conjugates.--
